NP III and Scorecard/Helper version 1.0.0.7e/2.0.0.7e
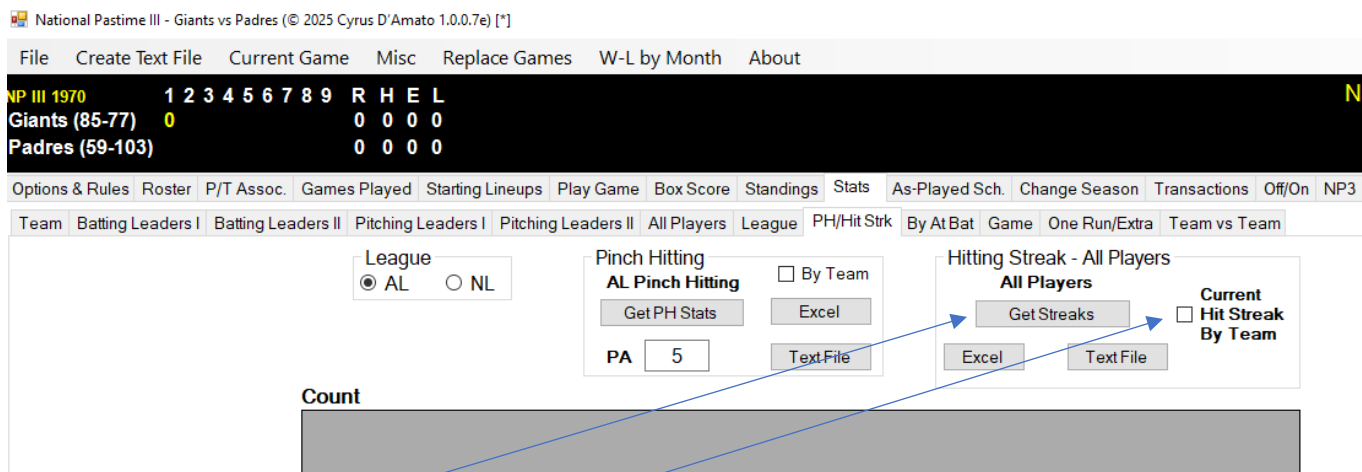

NP III application update goes from version 1.0.0.7d to 1.0.0.7e.

Scorecard/Helper application goes from 2.0.0.7c to 2.0.0.7e.

Note: there were no updates to Scorecard/Helper after version 2.0.0.7c. The reason for changing the version from 2.0.0.7c to version 2.0.0.7e was because the new addition (current hitting streaks) was made for both applications. NP III and Scorecard/Helper will have the same version number (x.0.0.7e).

Addition to version x.0.0.7e:

The ability to look and/or print current hitting streaks by team for an on-going replay. Although the previous version would display each player as they came to bat their season's best hitting streak and their current hitting streak. You could only view best and current hitting streaks if you were playing a game.

New addition: check box labeled Current Hit Streak by Team. Check this Check Box and when you click on the When you click on the Get Streaks Button a pop-up window appears with a combo box with a list of teams in your replay.

A Window Pop-Up allows you to select a team (Pirates selected), and when you click the OK Button, the Grid will list all of the Pirate players and their season best hitting streak and their current streak.
