Because we're playing in a National park the DH is not being used. David Ortiz is not in the default lineup when the DH is not in use. If you wanted to place Ortiz in the starting lineup you would place the Mouse cursor over his name and press the Mouse button.

Keeping the Mouse Button pressed simply drag Ortiz to place in the Lineup you want him to bat.

David ORTIZ Bats: L Throws: L Speed: Average Positions: DH, 1B 4 Steal: 11/N

2	Shane VICTORINO	9
3	Dustin PEDROIA	4
4	David ORTIZ	3
5	Daniel NAVA	7
6	Jarrod SALTALAMACCHIA	2

In this example Ortiz replaces Napoli. Because Napoli was playing first base it was not necessary to change the fielding position for Ortiz.

You would use the same method to change the starting pitcher. If you wanted Buchholtz to start in place of Lester simply drag Buchholtz and place him on top of Lester.
