

NP III and Scorecard/Helper applications (Version x.0.0.5d) – 7/11/2019

The addition made to both the NP III and Scorecard/Helper apps is the ability to move players to their respective team at the Start or at the End of the Season. The default is the same, that is, the Season Database ships (downloads) with the Players on their respective team at the end of the season. You can switch the players back and forth to their teams at the start or the end of the season as many times as you wish. Note, when you click the button to move the players to either the Start or the End of the season you are warned all prior player moves is negated. This new feature is located on the Top Left of the existing P/T Assoc. Tab and is displayed in the graphic below:

The screenshot shows the NP III application interface. At the top, there is a menu bar with options: File, Create Text File, Current Game, Misc, Replace Games, and About. Below the menu bar is a scoreboard for 'NP III 1950' showing runs, hits, and errors for Pirates and Cardinals. The Pirates have 0 runs, 0 hits, and 0 errors. The Cardinals have 0 runs, 0 hits, and 0 errors. Below the scoreboard is a tabbed interface with tabs for Options & Rules, Roster, P/T Assoc., Games Played, Starting Lineups, Play Game, Box Score, Standings, Stats, As-Played Sch., and Change Season. The 'P/T Assoc.' tab is active, showing a 'Set Roster to Start or End of Season' section with radio buttons for 'Start of Season' (selected) and 'End of Season', and a 'Set Roster' button. Below this is a 'Find a Player' section with input fields for 'Enter Player ID' and 'Enter Player Name', and a 'Double-Click on Player's Name' instruction. To the right is a 'Player/Team Association' table with columns for Player ID, Player Name, Team ID, and Team. The table lists players 1 through 7, all associated with Team 1. A red arrow points from the 'Set Roster' button to the text above.
